## Character / Soft Skills

Intrinsically motivated to solve challenging problems  
Get things done *right* mindset  
Autodidactic learner  
Excellent written and verbal communication skills  
Aspires to not be “just another programmer”

## Programming Style

Prefers a functional style; reducing side-effects, pure functions, programming around pipelines and event streams  
Values clean, extensible code. Do it the right way the first time and mitigate headaches from down the road.  
Code is not a black box; do not write unreadable code that leaves others, including your future self, from figuring it out.
