Education

University of Waterloo
BASc in Systems Design Engineering, 2023

Thornhill Secondary School
Graduated June 2016, Honours

Bitmaker Labs
2014, Web Development

August 2016–August 2018

Intermediate Solutions Developer   #paid inc.

Defined, coached, and supported junior and intermediate developers in the delivery of features and small projects.

Principal software architect for the development of scalable software infrastructure to scrape, crawl, and analyze social media networks.

Interim head of the developer team for a period of 6 months in the absence of a CTO. Worked with and under the direction of the Head of Product and the VP of Design. Provided insight into the technical considerations of designs, product directions/features, and developed process improvements for better designer-developer handoff.

Principal back-end developer as we scaled our software from 10 to 35 employees. Completely redeveloped our influencer collaboration workspace—front-end and back—that allowed #paid to execute campaigns on all major social networks. Lead developer on our RFP wizard that streamlined our sales process.

Technical Skills and Tools

Experienced and productive in

				Familiarity
Ruby	Python	Rails	Git	Go
Elixir	Node.js	SCSS	PostgreSQL	Clojure
JavaScript	CSS3	Bootstrap	Redis	React
