September 2016–Present

Full Stack Developer #paid

Managed a research team to develop custom artificial intelligence models for influencer recommendations, and lead development of integration into the platform.

Streamlined the sales pipeline by being the lead developer on a new RFP submission process, providing clients with an online, accessible RFP wizard that guides potential customers through the RFP process.

Single-handedly architected and completely redeveloped the collaboration workspace, increasing the efficiency of our accounts team at managing influencers.

Through warmth, availability, and knowledgeability, provided support to both developers and all staff, as well as developping a culture where no one is afraid to report issues, request features, or receive technical help.

Summer 2013–August 2017

Freelance Web Designer/Developer

Created an automated system to crawl and generate statistics for over 3.5 million Instagram accounts

Communicated project requirements with clients, designed, and developed static, Wordpress, and Ruby on Rails sites for local businesses

Open Source Contributions

CSV.js creator
A simple, blazing-fast CSV parser and encoder.
⭐ **1394 stargazers**   github.com/knrz/CSV.js

crutches maintainer
ActiveSupport-inspired Elixir support library
⭐ **120 stargazers**   github.com/mykewould/crutches

Character / Soft Skills

Empathetic and active listener

Excellent written and verbal communication skills

Instrincally motivated teacher

Patient, mindful

Get things done *right*

Autodidact

Programming Style

Prefers a functional style; reducing side-effects, pure functions, programming around pipelines and event streams

Values clean, extensible code. Do it the right way the first time and mitigate headaches from down the road.

Code is not a black box; do not write unreadable code that leaves others, including your future self, from figuring it out.

Education

Thornhill Secondary School
Graduated June 2016, Honours

Bitmaker Labs
June–August 2014

Technical Skills and Tools

Experienced and productive in

Ruby	Python	Rails
Elixir	Node.js	SCSS
JavaScript	CSS3	Bootstrap

Familiarity

Git	Go
PostgreSQL	Clojure
Redis	React
